Deflection Comparison for 16mm Multilayer Polycarbonate sheets

16mm Standard Grade 

16mm Titan Sky Grade 

16mm RFX Selectogal Grade 

Load vs. Distance Between Purlins
at an Absolute Deflection of 10 mm and Various Rafters Distance

The information in these calculation programs is meant to generally familiarize the user with Polygal's products and their potential applications, and should be treated as such. Proper assembly, installation and maintenance of Polygal's Polycarbonate sheets are essential if the benefits of experienced product design and engineering, quality materials, and skilled workmanship are to be fully attained. Every assembly and installation is different (windloads, structural support, etc.) and Polygal strongly recommends consultation with Polygal's Technical Support Dept. or with an experienced contractor, architect or structural engineer prior to the assembly and installation of any Polygal product. The information contained in the calculation programs cannot in anyway substitute such consultation. Assembly and installation of Polygal's products is the sole responsibility of the customer and Polygal shall bear no liability in this regard.
