# Interior design

The unique qualities of nature abound throughout the environment. Visually, nature provides us with a never-ending source of hues and shades, depth of color, shape, and the play of light and shadow. Nature also has a spiritual effect as it creates a special atmosphere, its harmonious flow conveying a sense of openness. Polygal sheets for interior design allow us to bring some of nature's qualities into the office, store or home. Polygal sheeting creates a sense of aesthetic space together with strength and stability. It offers creative freedom with almost unlimited design options. The sheeting is available in a wide range of colors and levels of transparency, and ranges in thickness from 6 mm to 16 mm. The sheets are flexible with different levels of transparency. They are heat resistant, easily installed and can be used in a variety of applications such as partitions, ceilings, display windows, display areas, exhibitions, signs, etc.

Always look for the original sign

The data in this advertisement are provided in good faith and constitute general information without commitment, and no warranty is given or implied. Polycarbonate is a combustible thermoplastic that complies with various international standards, as customary in each country. Avoid exposure to excessive heat or aromatic cleaning solvents. Normal fire precautions should be taken to protect against combustion.
